About the Event

2022.opennebulaconf.com

OpenNebula is the open source platform of choice in the converged data center, providing a simple, albeit flexible and powerful, cloud manager that supports traditional IT features and the dynamic provisioning of modern enterprise clouds. For more than a decade, OpenNebula has formed a wide user base among leading companies in banking, technology, telecom and hosting, and research, becoming the point-of-reference for open source **private**, **hybrid**, and **edge cloud** solutions.

The OpenNebula Conference is for cloud users, developers, administrators, integrators and researchers, featuring in-depth presentations and exploratory use cases. They also include Hands-on tutorials, workshops, and hacking sessions providing an opportunity to discuss burning ideas, and meet face to face to discuss development.

Previous speakers include Telefónica, Booking.com, Innologica, King, Nordeus, StorPool, Santander Bank, CentOS, European Space Agency, FermiLab, Puppet, Red Hat, BlackBerry, Akamai, Runtastic, Citrix, Trivago...and many more.

Why Sponsor the OpenNebula Conference?

The OpenNebula Conference is a rendezvous providing the opportunity to reach a highly-segmented technical community of developers, sys-admins, managers of large infrastructures, and leaders whose charge it is to build flexible, integrated cloud solutions, while keeping an astute eye on new and exciting opportunities.
